LAUNCHING OF THE ONLINE EDITION OF DU CHÂTELET'S INSTITUTIONS DE PHYSIQUE

CELEBRATION | 17.12.2021 | 2:00 PM - 4:00 PM | CENTER FOR THE HISTORY OF WOMEN PHILOSOPHERS AND SCIENTISTS

On the 17.12. to celebrate Émilie du Châtelet's 315th birthday, the digital edition of the *Institutions de physique* went online. We started by the launching with the Avant-Propos in order to share our work in progress with the scientific community.

During our online presentation, beginning at 2 PM (European Time), you got to know the editors and their different areas of work and expertise. You were informed about the progress of the work and the difficulties they have had to face and still have to deal with. Besides, you will be the first to have insight in the new edition.

Stay tuned for further information and further chapters launched!! We will upload the online presentation on our YouTube Channel!

Talk | Clara Carus | 12.12. 6pm Israel Time | Bar-Ilan University, STS Study Department Colloquium | Émilie du Châtelet on the Formation of the Ideas of Space and Time

Émilie du Châtelet took up a unique position within the heated debate on the absolute or relative being of time and space in the Early Modern era. While she agreed with Leibniz that time and space are relative beings, dependent upon the real beings they were abstracted from, she was the first scientist to explain how the notion of absolute space and time comes about and to legitimise the use of the ‘imaginary being’ of absolute space and time without relationship to ‘real beings’ in the sciences. She was the first scientist to offer an epistemological explanation for the relative being of space and time *and* for the imaginary notion of absolute space and time. Du Châtelet arrives at this epistemological explanation of the concept of space and time through a new method she develops and employs: an analysis of our

ideas of space of time, which she also calls an investigation into the formation of the ideas of space and time. In this presentation, I will outline Émilie du Châtelet's unique position within the space/time debate and present her original approach to the topic of their relative or absolute being.
